# **Special needs Polairis**

## Closed circuit cooling towers

## Special needs Polairis

Our ongoing <u>R&D</u> investment helps BAC offer you a complete set of solutions for Polairis<sup>™</sup> evaporative closed circuit coolers that meet your needs. Plus, we also cater for extra requirements such as:

#### **Plume control**

Tap into abundant BAC plume control experience. For the Polairis line, we offer <u>plume abatement coils</u> with **reduced plume and extended dry operation periods.** 

Check out our <u>BAC plume visualization software</u> for insight into **how your cooling equipment will plume** before installation. Helping you choose the best and most effective plume abatement solution.

#### Water savings

You need water for evaporative cooling. At BAC, however, we offer acclaimed and advanced water saving technologies. Helping in this aim are:

- Electric water level control package
- Water treatment equipment
- Plume abatement coil

### Enhanced hygiene and water care

Water circulates in closed circuit coolers and it is important to avoid excessive accumulation of dissolved solids. The following options help keep your cooler clean:

- Remote sump connection
- Water treatment equipment
- <u>Clean out port</u>
- Filters

To control biological growth and scale formation, the water quality of the circulated water should be checked regularly. <u>Water quality guidelines</u> can be found in the <u>Knowledge center</u> of the website.

#### Year-round reliable operation

Inspect and maintain your cooler and protect it against extreme weather for year-round reliability. The options below help keep your cooler running smoothly and reliably and facilitate maintenance.

- Remote sump connection
- Water treatment equipment
- <u>Clean out port</u>
- Filters
- Electric water level control package
- Plume abatement coil

**Do you too want to benefit from the above solutions?** Contact your **local BAC representative** for more information.
