

Spray branches

Spare parts guide

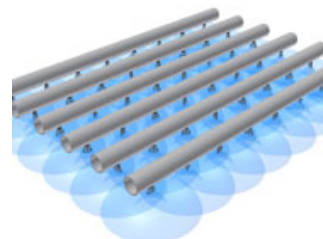

Spray branches

- Constructed of corrosion resistant **PVC**
- Includes nozzles selected for required **system flow rate** and secured in **grommets** for easy removal and replacement
- Designed for **all system flow rates**

Maintenance tip

Even though the large orifices prevent clogging, large pieces of dirt, debris or scale formation may cause clogging of the spray pipes and the nozzles. **Frequent visual inspection** of the spray pattern is easy, fast and will ensure **optimal thermal performance** of your BAC equipment.

Want to replace the spray branches of your BAC equipment?
