Special needs?

Refrigerant condensers

Special needs?

Our ongoing <u>R&D</u> investment helps BAC offer you a complete set of solutions for HXC evaporative condensers that meet your needs. Plus, we also cater for extra requirements such as:

Year-round reliable operation

Inspect and maintain your condenser and protect it against extreme weather for year-round reliability. The options below help keep your condenser running smoothly and reliably and facilitate maintenance.

- Remote sump connection
- Water treatment equipment
- Sump sweeper piping
- Filters
- Platforms
- Internal service platform
- <u>Vibration cut out switch</u>
- Basin heater package
- <u>Safety switch</u>
- <u>Standby pump</u>
- Electric water level control package
- <u>Baltibond[®] hybrid coating</u>

Enhanced hygiene and water care

Water circulates in evaporative condensers and it is important to avoid excessive accumulation of dissolved solids. The following options help keep your condenser clean:

- Remote sump connection
- BACross bundles
- <u>Water treatment equipment</u>
- Sump sweeper piping
- Filters
- <u>Baltibond[®] hybrid coating</u>

To control biological growth and scale formation, the water quality of the circulated water should be checked regularly. <u>Water quality guidelines</u> can be found in the <u>Knowledge center</u> of the website.

Water savings

You need water for evaporative cooling. At BAC, however, we offer acclaimed and advanced water saving technologies. Helping in this aim are:

- Electric water level control package
- Water treatment equipment
- Sump sweeper piping
- <u>Baltibond[®] hybrid coating</u>

Do you too want to benefit from the above solutions? Contact your <u>local BAC representative</u> for more information.
